

## **Arnold Moodenbaugh**

1975 Ph.D from University of California, San Diego, in Physics (Superconductivity in defect rocksalt structure sulfides . . .)

1975-77, Post-doc at Illinois Inst. of Tech, Chicago, IL Scientist at ILL from 1988-1992

1977- , Brookhaven National Lab., Presently Scientist in Materials Science Department, member of Superconductivity group.

Interests include synthesis, including polycrystalline materials and thin films, superconductivity, and characterization, including high resolution x-ray diffraction and soft x-ray absorption measurements.
